

Meeting 3/30

1. What have you accomplished since last meeting?
2. Are there any obstacles in the way of reaching your goal?
3. What will you get done by the next meeting?

Mitali(Programmer) and Tanuja:

1. We finished making the title clickable on the Paper List page and when it is clicked on a popup opens that shows the abstract.
2. Not yet!
3. We are going to work on highlighting the searched term of the abstract

Prerana(Programmer) and Varshi

1. We figured out how to direct the user to the Page List page for the word pressed on when a word from the word cloud is pressed
2. Not yet!
3. We are going to work on repeating this process for all words, and linking the PDF download to the abstract popup.

Arpita(Programmer) and Maya:

1. We are struggling with the download functionality of the PDF of the full text
2. Arpita: yes

Mitali: Ok so what language are you trying to accomplish this in

Maya: php

Mitali: I think it would work better if you try javascript

I know of some JQuery methods with which download might be possible that you might want to try. Also look into using the download setting of the <a> tag

Arpita: Ok we will try that and let you know by tomorrow how we progress

3. We are going to try to finish the download functionality for the PDF of the full text
